

Tailor made edge profiles

ATELIERS NECTOUX

MANUFACTURER SINCE 1930

Made-to-measure Pewter counter "LES ZINCS"

Established in 1930 by Marcel Nectoux, rue de Charonne in Paris, we are the last specialist of made-to-measure pewter counter tops. In order to manufacture a wide variety of edge profiles, we own moulds that are typical of the 1900-1930s. Our oldest model dates back to 1870, which means we cover the « Belle Epoque » style to the « Art Déco » era, and beyond. Over our 90 years of existence we have produced made to measure counter tops all over Paris, France and the world.

In 2009, we were awarded the label « Entreprise du Patrimoine Vivant » by the French Ministry of Economy. The exclusive « EPV » label rewards French companies for the excellence of their traditional and industrial know-how.
